Objective

Aspiring software developer specializing in secure, AI-powered back-end and full-stack (MERN) applications. Passionate about delivering robust, scalable, and intelligent solutions. Seeking internship opportunities to further advance technical expertise and contribute to impactful projects.

Education

Bachelor of Science in Computer Science

Gondar University, Ethiopia

3rd Year Student | Expected Graduation: 2027

- Focus: Back-end Development
-

Technical Skills

- **Programming Languages:** C++, Java, JavaScript, Python
 - **Libraries/Frameworks:** React.js, Next.js, Node.js, Express, NestJS, FastAPI, Bootstrap, Redux
 - **Databases:** MongoDB, PostgreSQL, MySQL
 - **AI/ML Tools:** NumPy, Pandas, Matplotlib, scikit-learn, PyTorch
 - **Security:** JWT, OAuth, HTTPS, Input Validator
 - **Tools:** Git, GitHub, VS Code, GitHub Copilot, NetBeans, Code::Blocks, Vercel
 - **Others:** Responsive Web Design
-

Projects

ToDoS App (MERN Stack)

- Designed and implemented a full-stack to-do application enabling users to add, update, and delete tasks.
- Integrated secure authentication (JWT), with user registration and login features.
- Used Bootstrap for responsive UI and MongoDB Atlas for database.

Blood Bank Management System (MERN Stack, Voluntary Project)

- Developed a platform for individuals to register and schedule blood donations; hospitals manage and view available blood.
- Included health verification, hospital authorization, and appointment scheduling modules.
- Supported Menna in Gondar city for organizing donations to children, elderly, and those in need.

Job Board Portal (AI + MERN + Security) *(In Progress)*

- Building an AI-powered job posting portal where companies register and post jobs and seekers apply, with intelligent job recommendations.
 - System under development with secure back-end focused on authentication and user data privacy.
-

Certifications & Courses

- Udacity Nanodegrees: Artificial Intelligence, Android Application Development, Data Science, Programming Basics
 - FreeCodeCamp: Responsive Web Design, Back-End Certification (in progress)
 - SkilUp: HTML, CSS, JavaScript
 - Ongoing: Udacity Python, AI, ML; FreeCodeCamp Back-End
-

Volunteering & Leadership

Blood Bank Management System (Menna, Gondar City)

- Led and developed the platform to facilitate blood donation logistics, enable volunteer registration, and support at-risk groups.
 - Managed digital event updates, multimedia storage, and information systems.
-

Languages

- Amharic (Native)
 - English (Fluent)
-

Soft Skills

- Strong problem-solving and analytical thinking
 - Effective communication and information gathering
 - Teamwork and proactive engagement
-

Personal Statement

I am a developer focused on building secure, AI-powered back-end applications that deliver real-world impact. I welcome opportunities to turn ideas into reliable software collaborating with innovative teams.
